The CIML is recruiting

a Research assistant (*“Ingénieur(e) d’étude”*)

The « Neural regulation of Immunity » team (<http://www.ciml.univ-mrs.fr/science/lab-sophie-ugolini/innate-lymphoid-cells-and-neural-regulation-immunity>) is recruiting a research assistant for 2 to 5 years. The position is available immediately.

Missions

- Involvement in projects studying neuro-immune interactions
- *In vitro* and *in vivo* experiments (human and mouse models)
- Monitoring and management of mouse lines
- Development of new experimental approaches in line with research projects
- Lab management (ordering reagents, organizing shared team tasks)

Skills

- Mouse line management, mouse breeding techniques, mouse handling (injections, organ harvesting, anesthesia, etc.)
- Molecular biology (DNA/RNA extraction, PCR, etc.)
- Cell biology (cell culture, tissue processing, etc.)
- Flow cytometry
- Immunofluorescence / imaging techniques

Profile

- Master 2 or PhD (Immunology or Neuroscience)
- Experience in animal experimentation
- Autonomy, organization and rigor
- Motivation and flexibility
- Willingness to work in a team

Applicants have to send a CV, a cover letter and the contact details of 2 referees
